Professional Summary

Motivated Junior Frontend Developer with a Bachelor's degree in Software Engineering and hands-on experience building web applications using HTML, CSS, and JavaScript. Skilled in DOM manipulation, Local Storage, Fetch API, REST APIs, asynchronous JavaScript, Git, and GitHub. Developed practical projects including an Expense Tracker, E-commerce Website, Quiz App, and Weather App. Strong analytical and problem-solving background with a focus on building user-friendly web applications and continuously developing modern frontend skills.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, Responsive Web Design
JavaScript: Arrays, Array Methods, Functions, Events, Promises, Async/Await, JSON, Error Handling
Web Technologies: Fetch API, REST APIs, Local Storage, CRUD Operations, Form Validation
Tools & Version Control: Git, GitHub, Visual Studio Code, Chrome DevTools
Development: Dynamic UI Development, Client-Side Data Management, API Integration
Currently Learning: React.js

PROJECTS

Expense Tracker | HTML, CSS, JavaScript, LocalStorage, Git, GitHub Pages

- Developed a web-based expense tracker with features to add, edit, delete, and validate expenses.
- Implemented dynamic expense calculations and real-time total expense updates using JavaScript.
- Used LocalStorage to persist expense data and Git/GitHub for version control and deployment.

E-commerce Website | HTML, CSS, JavaScript, LocalStorage

- Built a functional e-commerce website with dynamic product rendering and product data management.
- Implemented shopping cart functionality including quantity management, item removal, cart totals, and LocalStorage persistence.
- Developed a checkout and order management system with customer information, order details, and order status management.

Quiz App | HTML, CSS, JavaScript, DOM Manipulation

- Developed an interactive quiz application with dynamically generated questions and answer buttons.
- Implemented answer selection, correct/wrong feedback, question navigation, and score tracking.
- Used JavaScript arrays, objects, functions, DOM manipulation, and event handling to control application logic.

Weather App | HTML, CSS, JavaScript, Fetch API

- Built a weather application that retrieves weather information from an external API based on the user's selected city.
- Implemented Fetch API, Promises, JSON parsing, and error handling to process API responses.
- Dynamically displayed API data and weather information in the user interface.

PROFESSIONAL EXPERIENCE

Freelance Web Developer
Self-Employed | June 2025 – Present

- Develop responsive and user-friendly web applications using HTML5, CSS3, and JavaScript (ES6+).
- Build interactive applications with DOM manipulation, event handling, form validation, CRUD operations, and browser Local Storage for persistent data management.
- Integrate REST APIs using Fetch API, Promises, async/await, JSON, and error handling to retrieve and display dynamic data.
- Develop and maintain projects including Expense Tracker, Weather App, Quiz App, and E-commerce Website.
- Implement application features such as expense management, data editing and deletion, interactive quizzes, score tracking, and API-driven weather information.
- Use Git and GitHub for version control, source code management, and project deployment through GitHub Pages.
- Test application functionality, troubleshoot bugs, and improve usability, responsiveness, and code quality.

Investigative Research and Analyst
DeRisc Group | June 2022 – May 2025

- Conducted detailed research and analysis using information from multiple sources to identify issues, patterns, and relevant findings.
- Analyzed and organized complex information to support accurate reporting and informed decision-making.
- Prepared structured reports and documentation while maintaining accuracy and attention to detail.
- Applied analytical and problem-solving skills to investigate issues and develop practical solutions.
- Managed multiple tasks, maintained organized records, and consistently met deadlines.

E-commerce Officer
IZOC Solutions | May 2021 – May 2022

- Managed day-to-day e-commerce operations, maintaining accurate product, order, and customer information.
- Coordinated product information and online listings to maintain accuracy and consistency across e-commerce platforms.
- Analyzed sales and order-related information to identify issues and support operational decision-making.
- Handled customer and order-related queries while ensuring timely resolution of issues.
- Maintained organized records and digital workflows to support daily e-commerce operations.

Virtual Assistant / Administrative Assistant
Remote | Jan 2021 – April 2021

- Managed digital information, documents, and online workflows with a strong focus on accuracy and organization.
- Used digital tools and online platforms to manage administrative tasks and maintain structured information.
- Researched and organized information from multiple online sources to support business operations.
- Identified and resolved routine technical and operational issues while working independently in a remote environment.
- Managed multiple tasks, maintained accurate records, and consistently met deadlines.

EDUCATION

Bachelor's Degree in Software Engineering
Iqra University, Islamabad, Pakistan | Jan 2016 – Dec 2020
